## TOP NEWS OF THE FOURTH QUARTER

**WANDUSOA JOINS THE LEADING NETWORK FOR NATURE POSITIVE ACTION**

### **READ MORE**

Wandusoa has joined Restor to utilize its robust tools and infrastructure, which are essential for effectively tackling complex environmental challenges. We are committed to meeting the growing demands for transparency from both consumers and regulators. This partnership enables Wandusoa to make data-driven decisions, and we are determined to create a significant positive impact on both nature and society.

Wandusoa partners with reNature to advance regenerative agriculture through automation. We aim to shift regenerative practices from niche interests to essential methods in land-based production. By providing farmers with insights and practical tools, we combine on-the-ground implementation with innovative technology for a more sustainable farming approach.

**A MEANINGFUL PARTNERSHIP WITH RENATURE**

# RESTOR NOMINATES WANDUSOA FOR THE PRESTIGIOUS EARTH SHOT PRIZE 2025

Restor enthusiastically nominates Wandusoa for the distinguished Earthshot Prize 2025, celebrating their remarkable impact on environmental innovation and commitment to a sustainable future.

**ADMISSION INTO WANDUSOA  
REGENERATIVE AGRICULTURE SCHOOL  
3RD BATCH 2025 IS STILL ONGOING.**

**WE WOULD APPRECIATE IT IF YOU'D CHECK OUT THIS CROWDFUNDING CAMPAIGN, SUPPORT IT, AND SPREAD THE WORD! DONATE BY CLICKING HERE.**

Don't miss your chance to join the third batch of the Wandusoa Regenerative Agriculture School for 2025! Admissions are still open, so take this opportunity to enhance your skills and make a difference in sustainable farming.

Partner with us

With your support, we can train and equip marginalized youth with regenerative agricultural and business skills and knowledge, empowering them to become stewards of our planet. Together, we can make a significant difference!

**We need USD10,000** to offer a scholarship to our 3rd cohort of 20 internally displaced youths at the Wandusoa Regenerative Agriculture School, who will train to become regenerative farmers in 2025 using our school-based approach.

**We need USD200,000** for a revolving fund to assist 100 smallholder farmers in transitioning to regenerative farming within 3 years.

*We are also seeking technical support, volunteers, and experts to help us improve our training program.*
